Durango Airport Reports

Durango, November 17, 2026.— A private aircraft was involved in an accident Tuesday morning within the perimeter of Durango Airport, outside the runway and its safety areas. Airport emergency services immediately activated the appropriate response protocols and extinguished the fire caused by the incident.

As a precautionary measure, flight operations were temporarily suspended. After confirming that the runway and airport infrastructure had not been affected, the airport resumed normal operations.

The accident site remains under the control of federal and law enforcement authorities, which are carrying out the appropriate procedures. Information concerning the aircraft's occupants and the cause of the accident will be released by the relevant authorities.

Durango Airport remains in close coordination with the authorities and is providing all necessary assistance to support the investigation.
