

Monterrey International Airport Transforms the Digital Experience for its Passengers

- OMA presents the new Monterrey International Airport website, featuring a more modern, intuitive, and personalized navigation experience.
- The new platform allows users to book services such as official airport parking, Fast Track, and the OMA Premium Lounge online with agility, certainty, and transparency. By booking in advance, passengers can receive discounts of up to 50% on parking and 20% on Fast Track and OMA Premium Lounge services.
- This renewal is part of the digital transformation strategy that OMA is gradually implementing across its airport network.

Monterrey, N.L., October 27, 2026 – As part of its digital transformation strategy, Grupo Aeroportuario del Centro Norte (OMA) is launching the new Monterrey International Airport website. This revamped platform strengthens and streamlines the digital passenger experience by facilitating access to information and services before, during, and after their journey.

With a refreshed design optimized for any device, the site allows users to check flight statuses in real-time, locate services within the terminal, and plan their visit to the airport more efficiently. A key feature of the portal is the integration of online booking for parking, Fast Track, and OMA Premium Lounge services, making Monterrey International Airport the first in the country to offer this capability.

The integration of these services responds to evolving traveler habits, as passengers increasingly seek to resolve key aspects of their experience in advance and access digital solutions that provide greater peace of mind, flexibility, and comfort. By booking ahead, passengers can secure discounts of up to 50% on parking and 20% on Fast Track and OMA Premium Lounge services, while also guaranteeing their spot before leaving home and arriving at the terminal with greater confidence.

"We want every interaction with our airports to be simpler, more efficient, and more comfortable. This website renewal reflects that commitment by providing passengers with tools that allow them to better plan their trip, gain greater autonomy, and make the most of their time before they even reach the terminal, all through a convenient and simple experience," noted Ricardo Dueñas, CEO of OMA.

The renewal of the Monterrey International Airport website is part of a broader modernization program that OMA is gradually implementing across its airport network, with the project slated to include all airports in the group. It is important to note that the booking section currently applies only to the Monterrey Airport as part of the first phase.

With this initiative, OMA continues to strengthen the digitalization of its services to offer solutions that meet passenger needs and contribute to an increasingly efficient, connected, and user-centric airport experience.
