

## **OMA inaugurates new terminal building at Ciudad Juárez International Airport: greater capacity, enhanced passenger experience, and a boost to regional competitiveness**

- Historic investment of 828.4 million pesos that doubles the terminal's operational capacity.
- Ciudad Juárez Airport records a cumulative investment of more than 2 billion pesos between 2016 and 2024.

**Ciudad Juárez, Chihuahua, August 26, 2025** – Grupo Aeroportuario del Centro Norte (OMA) and VINCI Airports announced the official inauguration of the new terminal building and the comprehensive renovation of the concourse at Ciudad Juárez International Airport (CJS), a project that doubles the terminal's operational capacity and positions the city as a key connectivity and business hub for Mexico and the United States.

With an investment of 828.4 million pesos, the expansion increases capacity to more than 2.6 million passengers per year, with a flow of up to 1,386 people per hour, and adds over 13,800 m<sup>2</sup> of modern infrastructure. Highlights include:

- Cumulative investment of more than 2 billion pesos between 2016 and 2024.
- A final waiting lounge of 2,731 m<sup>2</sup> (more than triple the previous space).
- A 1,009 m<sup>2</sup> domestic baggage claim area.
- New commercial areas, security checkpoints, boarding bridges, and access points.
- A renewed architectural design with a modern and functional image.

"This project is more than just a physical expansion: it is a strategic investment in connectivity, competitiveness, and passenger experience. It reflects our long-term commitment to sustainable development and boosting the regional economy," stated Ricardo Dueñas, CEO of OMA.

The project generated more than 380 direct jobs during its construction and strengthens the network of 14 domestic destinations operated by airlines such as Viva, Volaris, Aeroméxico, and TAR, in addition to cargo operations with DHL and Aeronaves TSM. This infrastructure facilitates logistics and cross-border trade, as well as promoting tourism and business in the border region.

Future vision:

Between 2026 and 2030, OMA will invest around 1.1 billion pesos more to continue expanding the terminal building, focusing on:

- Expanding the check-in area and concourse to increase terminal capacity to 2.9 million passengers annually.
- Reconfiguring the baggage claim area.
- Building new access roads to the airport.
- Incorporating state-of-the-art technology to optimize processes.
- Ensuring full accessibility for people with disabilities.
- Implementing efficient lighting for energy savings.

This project is part of OMA and VINCI Airports' comprehensive strategy to develop world-class airport infrastructure, meeting standards of safety, operational efficiency, regulations, and environmental care.
